Special Issue on Generation of granitic rocks and deep crustal processes, edited by J.D. Clemens, D.H. Hutton

<i>Preface</i>	vii
Hercynian late-post-tectonic granitic rocks from the Fornos de Algodres area (Northern Central Portugal)	
M.R. Azevedo and J. Nolan	1
Fluids, P - T paths and the fates of anatectic melts in the Earth's crust	
J.D. Clemens and G.T.R. Droop	21
Compressional granite-emplacement model: structural and magnetic study of the Trives Massif (NW Spain)	
T. Román-Berdiel, A. Aranguren, J. Cuevas and J.M. Tubía	37
Interpreting magmatic fabric patterns in plutons	
S.R. Paterson, T.K. Fowler Jr., K.L. Schmidt, A.S. Yoshinobu, E.S. Yuan and R.B. Miller	53
<i>Research Papers</i>	
Reaction textures in scapolite-wollastonite-grossular calc-silicate rock from the Kerala Khondalite Belt, Southern India: evidence for high-temperature metamorphism and initial cooling	
M. Satish-Kumar and S.L. Harley	83
Crustal contamination and fluid/rock interaction in the carbonatites of Fuerteventura (Canary Islands, Spain): a C, O, H isotope study	
A. Demény, A. Ahijado, R. Casillas and T.W. Vennemann	101
Geochemical evolution of peraluminous plutons in southern Nova Scotia, Canada—a pegmatite-poor suite	
K.L. Currie, J.B. Whalen, W.J. Davis, F.J. Longstaffe and B.L. Cousens	117
Fluid and melt inclusion evidence for the origin of idiomorphic quartz crystals in topaz-bearing granite from the Salmi batholith, Karelia, Russia	
M. Poutiainen and T.F. Scherbakova	141
